UNITED STATES DISTRICT COURT
NORTHERN DISTRICT OF CALIFORNIA

_____, Individually and On
Behalf of All Others Similarly Situated,

Plaintiff,

v.

ZOOM VIDEO COMMUNICATIONS,
INC., ERIC S. YUAN, and KELLY
STECKELBERG,

Defendants.

Case No.

CLASS ACTION

COMPLAINT FOR VIOLATIONS OF
THE FEDERAL SECURITIES LAWS

DEMAND FOR JURY TRIAL

1 Plaintiff (“Plaintiff”), individually and on behalf of all other persons similarly
2 situated, by Plaintiff’s undersigned attorneys, for Plaintiff’s complaint against
3 Defendants, alleges the following based upon personal knowledge as to Plaintiff and Plaintiff’s
4 own acts, and information and belief as to all other matters, based upon, *inter alia*, the investigation
5 conducted by and through Plaintiff’s attorneys, which included, among other things, a review of
6 the Defendants’ public documents, conference calls and announcements made by Defendants,
7 United States Securities and Exchange Commission (“SEC”) filings, wire and press releases
8 published by and regarding Zoom Video Communications, Inc. (“Zoom” or the “Company”),
9 analysts’ reports and advisories about the Company, and information readily obtainable on the
10 Internet. Plaintiff believes that substantial evidentiary support will exist for the allegations set
11 forth herein after a reasonable opportunity for discovery.
12

13
14 **NATURE OF THE ACTION**

15 1. This is a federal securities class action on behalf of a class consisting of all persons
16 other than Defendants who purchased or otherwise acquired Zoom securities between April 18,
17 2019 and April 6, 2020, both dates inclusive (the “Class Period”), seeking to recover damages
18 caused by Defendants’ violations of the federal securities laws and to pursue remedies under
19 Sections 10(b) and 20(a) of the Securities Exchange Act of 1934 (the “Exchange Act”) and Rule
20 10b-5 promulgated thereunder, against the Company and certain of its top officials.
21

22 2. Zoom was founded in 2011 and is headquartered in San Jose, California. The
23 Company was formerly known as Zoom Communications, Inc. and changed its name to Zoom
24 Video Communications, Inc. in May 2012.

25 3. Zoom provides a video communications platform application (“app”) that allows
26 users to interact with each other primarily in the Americas, the Asia Pacific, Europe, the Middle
27 East, and Africa. Users may connect through frictionless video, voice, chat, and content sharing.
28

1 The Company’s cloud-native platform enables face-to-face video experiences and connects users
2 across various devices and locations in a single meeting. The Company serves education,
3 entertainment/media, enterprise infrastructure, finance, healthcare, manufacturing, non-profit/not
4 for profit and social impact, retail/consumer products, and software/Internet industries, as well as
5 individuals.

6
7 4. On March 22, 2019, Zoom filed a registration statement on Form S-1 with the SEC
8 in connection with its initial public offering (“IPO”), which, after several amendments, was
9 declared effective by the SEC on April 17, 2019 (the “Registration Statement”).

10 5. On April 18, 2019, Zoom filed a prospectus on Form 424B4 with the SEC in
11 connection with its IPO, which purported to provide information necessary for investors to
12 consider before partaking in its IPO and purchasing the Company’s newly publicly-issued stock
13 (collectively with the Registration Statement, the “Offering Documents”).

14
15 6. That same day, Zoom conducted its IPO and began trading publicly on the Nasdaq
16 Global Select Market (“NASDAQ”) under the ticker symbol “ZM.” Pursuant to Zoom’s IPO, the
17 Company sold 9.91 million of the Company’s shares to the public at the offering price of \$36.00
18 per share.

19 7. Throughout the Class Period, Defendants made materially false and misleading
20 statements regarding the Company’s business, operational and compliance policies. Specifically,
21 Defendants made false and/or misleading statements and/or failed to disclose that: (i) Zoom had
22 inadequate data privacy and security measures; (ii) contrary to Zoom’s assertions, the Company’s
23 video communications service was not end-to-end encrypted; (iii) as a result of all the foregoing,
24 users of Zoom’s communications services were at an increased risk of having their personal
25 information accessed by unauthorized parties, including Facebook; (iv) usage of the Company’s
26 video communications services was foreseeably likely to decline when the foregoing facts came
27
28

1 to light; and (v) as a result, the Company's public statements were materially false and misleading
2 at all relevant times.

3 8. The truth about the deficiencies in Zoom's software encryption began to come to
4 light as early as July 2019. However, due in large part to the Company's obfuscation, it was not
5 until the COVID-19 pandemic in March and April of 2020, with businesses and other organizations
6 increasingly relying on Zoom's video communication software to facilitate remote work activity
7 as governments increasingly implemented shelter-in-place orders, that the truth was more fully
8 laid bare in a series of corrective disclosures. As it became clear through a series of news reports
9 and admissions by the Company that Zoom had significantly overstated the degree to which its
10 video communication software was encrypted, and organizations consequently prohibited its
11 employees from utilizing Zoom for work activities, the Company's stock price plummeted,
12 damaging investors.
13

14
15 9. As a result of Defendants' wrongful acts and omissions, and the precipitous decline
16 in the market value of the Company's securities, Plaintiff and other Class members have suffered
17 significant losses and damages.

18 **JURISDICTION AND VENUE**

19 10. The claims asserted herein arise under and pursuant to Sections 10(b) and 20(a) of
20 the Exchange Act (15 U.S.C. §§ 78j(b) and 78t(a)) and Rule 10b-5 promulgated thereunder by the
21 SEC (17 C.F.R. § 240.10b-5).
22

23 11. This Court has jurisdiction over the subject matter of this action pursuant to 28
24 U.S.C. § 1331 and Section 27 of the Exchange Act.

25 12. Venue is proper in this Judicial District pursuant to Section 27 of the Exchange Act
26 (15 U.S.C. § 78aa) and 28 U.S.C. § 1391(b). Zoom is headquartered in this Judicial District,
27
28

1 Defendants conduct business in this Judicial District, and a significant portion of Defendants’
2 activities took place within this Judicial District.

3 13. In connection with the acts alleged in this complaint, Defendants, directly or
4 indirectly, used the means and instrumentalities of interstate commerce, including, but not limited
5 to, the mails, interstate telephone communications, and the facilities of the national securities
6 markets.

7 PARTIES

8
9 14. Plaintiff, as set forth in the attached Certification, acquired Zoom securities at
10 artificially inflated prices during the Class Period and was damaged upon the revelation of the
11 alleged corrective disclosures.

12 15. Defendant Zoom is a Delaware corporation with principal executive offices located
13 at 55 Almaden Boulevard, 6th Floor, San Jose, California 95113. Zoom securities trade in an
14 efficient market on the NASDAQ under the ticker symbol “ZM.”

15
16 16. Defendant Eric S. Yuan (“Yuan”) has served as Zoom’s President and Chief
17 Executive Officer at all relevant times.

18 17. Defendant Kelly Steckelberg (“Steckelberg”) has served as Zoom’s Chief Financial
19 Officer at all relevant times.

20 18. Defendants Yuan and Steckelberg are sometimes referred to herein as the
21 “Individual Defendants.”

22
23 19. The Individual Defendants possessed the power and authority to control the
24 contents of Zoom’s SEC filings, press releases, and other market communications. The Individual
25 Defendants were provided with copies of Zoom’s SEC filings and press releases alleged herein to
26 be misleading prior to or shortly after their issuance and had the ability and opportunity to prevent
27 their issuance or to cause them to be corrected. Because of their positions with Zoom, and their
28

1 access to material information available to them but not to the public, the Individual Defendants
2 knew that the adverse facts specified herein had not been disclosed to and were being concealed
3 from the public, and that the positive representations being made were then materially false and
4 misleading. The Individual Defendants are liable for the false statements and omissions pleaded
5 herein.

6
7 20. Zoom and the Individual Defendants are sometimes collectively referred to herein
8 as “Defendants.”

9 **SUBSTANTIVE ALLEGATIONS**

10 **Background**

11 21. Zoom was founded in 2011 and is headquartered in San Jose, California. The
12 Company was formerly known as Zoom Communications, Inc. and changed its name to Zoom
13 Video Communications, Inc. in May 2012.

14
15 22. Zoom provides a video communications app that allows users to interact with each
16 other primarily in the Americas, the Asia Pacific, Europe, the Middle East, and Africa. Users may
17 connect through frictionless video, voice, chat, and content sharing. The Company’s cloud-native
18 platform enables face-to-face video experiences and connects users across various devices and
19 locations in a single meeting. The Company serves education, entertainment/media, enterprise
20 infrastructure, finance, healthcare, manufacturing, non-profit/not for profit and social impact,
21 retail/consumer products, and software/Internet industries, as well as individuals.

22
23 23. On March 22, 2019, Zoom filed the Registration Statement on Form S-1 with the
24 SEC in connection with its IPO, which, after several amendments, was declared effective by the
25 SEC on April 17, 2019.

1 24. On April 18, 2019, Zoom filed a prospectus on Form 424B4 with the SEC in
2 connection with its IPO, which purported to provide information necessary for investors to
3 consider before partaking in its IPO and purchasing the Company’s newly publicly-issued stock.

4 25. That same day, Zoom conducted its IPO and began trading publicly on the
5 NASDAQ under the ticker symbol “ZM.” Pursuant to Zoom’s IPO, the Company sold 9.91
6 million of the Company’s shares to the public at the offering price of \$36.00 per share.
7

8 **Materially False and Misleading Statements Issued During the Class Period**

9 26. The Class Period begins on April 18, 2019, when Zoom conducted its IPO and its
10 shares began publicly trading on the NASDAQ pursuant to the materially false or misleading
11 statements or omissions contained in the Offering Documents. In the Offering Documents,
12 Defendants touted that Zoom’s “unique technology and infrastructure enable [*inter alia*] best-in-
13 class reliability,” and that Zoom “offer[s] robust security capabilities, *including end-to-end*
14 *encryption*, secure login, administrative controls and role-based access controls” (emphasis
15 added).
16

17 27. Additionally, the Offering Documents touted that “[o]ne of the most important
18 features of [Zoom’s] platform is its broad interoperability with a range of diverse devices,
19 operating systems and third-party applications”; that its “platform is accessible from the web and
20 from devices running Windows, Mac OS, iOS, Android and Linux”; that the Company has
21 “integrations with [*inter alia*] . . . a variety of other productivity, collaboration, data management
22 and security vendors”; and that the Company “provide[s], develop[s] and create[s] applications for
23 [its] platform partners that integrate[s] [its] platform with [its] partners’ various offerings.”
24

25 28. The Offering Documents also touted that, as part of Zoom’s growth strategy, the
26 Company “enable[s] developers to embed our platform into their own offerings through [*inter alia*]
27
28

1 . . . [its] cross-platform software development kits (SDKs),” such as those the Company used, or
2 would eventually use, when linking users’ data to Facebook.

3 29. Additionally, the Offering Documents generally touted that Zoom’s “cloud-native
4 platform delivers reliable, high-quality video that is easy to use, manage and deploy, provides an
5 attractive return on investment, is scalable and easily integrates with physical spaces and
6 applications”; that such “rich and reliable communications lead to interactions that build greater
7 empathy and trust”; and that Defendants “strive to live up to the trust our customers place in us by
8 delivering a communications solution that ‘just works.’”

9
10 30. The Offering Documents also assured investors that Zoom “strive[s] to comply with
11 applicable laws, regulations, policies and other legal obligations relating to privacy, data protection
12 and information security to the extent possible.”

13
14 31. Finally, the Offering Documents contained generic, boilerplate representations
15 concerning Zoom’s risks related to cybersecurity, data privacy, and hacking, noting that the
16 Company’s “security measures have on occasion, in the past, been, and may in the future be,
17 compromised”; that “[c]onsequently, our products and services may be perceived as not being
18 secure,” which “may result in customers and hosts curtailing or ceasing their use of our products,
19 our incurring significant liabilities and our business being harmed”; and that “actual or perceived
20 failure to comply with privacy, data protection and information security laws, regulations, and
21 obligations could harm our business.” Plainly, the foregoing risk warnings were generic “catch-
22 all” provisions that were not tailored to Zoom’s actual known risks concerning weaknesses in its
23 cybersecurity and data protection systems.

24
25 32. On June 7, 2019, Zoom filed its first Quarterly Report on Form 10-Q with the SEC
26 following its IPO, reporting the Company’s financial and operating results for the quarter ended
27 April 30, 2019 (the “1Q20 10-Q”). The 1Q20 10-Q contained substantively the same statements
28

1 referenced in ¶¶ 27 and 29-31, *supra*, touting the way Zoom interacts with various operating
2 systems and third-party applications, the trust its platform builds with customers and users, and
3 the Company’s efforts relating to privacy, data protection and information security; and providing
4 generic “catch-all” provisions that were not tailored to Zoom’s actual known risks concerning
5 weaknesses in its cybersecurity and data protection systems.

6
7 33. Appended as an exhibit to the 1Q20 10-Q were signed certifications pursuant to the
8 Sarbanes-Oxley Act of 2002 (“SOX”), wherein the Individual Defendants certified that the 1Q20
9 10-Q “fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange
10 Act of 1934 and that information contained in [the 1Q20 10-Q] fairly presents, in all material
11 respects, the financial condition and results of operations of Zoom.”

12
13 34. The statements referenced in ¶¶ 26-33 were materially false and misleading because
14 Defendants made false and/or misleading statements, as well as failed to disclose material adverse
15 facts about the Company’s business, operational and compliance policies. Specifically,
16 Defendants made false and/or misleading statements and/or failed to disclose that: (i) Zoom had
17 inadequate data privacy and security measures; (ii) contrary to Zoom’s assertions, the Company’s
18 video communications service was not end-to-end encrypted; (iii) as a result of all the foregoing,
19 users of Zoom’s communications services were at an increased risk of having their personal
20 information accessed by unauthorized parties, including Facebook; (iv) usage of the Company’s
21 video communications services was foreseeably likely to decline when the foregoing facts came
22 to light; and (v) as a result, the Company’s public statements were materially false and misleading
23 at all relevant times.

24
25 **The Truth Begins to Emerge**

26 35. On July 8, 2019, during intraday trading hours, security researcher Jonathan
27 Leitschuh (“Leitschuh”) linked an article published by him that day to his Twitter account, which
28

1 allegedly exposed a flaw allowing hackers to take over Zoom webcams. According to the article,
2 “[a] vulnerability in the Mac Zoom Client allows any malicious website to enable your camera
3 without your permission,” and “[t]he flaw potentially exposes up to 750,000 companies around
4 the world that use Zoom to conduct day-to-day business.”

5
6 36. On this news, Zoom’s stock price fell \$1.12 per share, or 1.22%, to close at \$90.76
7 per share on July 8, 2019.

8 37. Then, on July 11, 2019, public interest research center the Electronic Privacy
9 Information Center (“EPIC”) filed a complaint against Zoom before the U.S. Federal Trade
10 Commission (“FTC”), alleging that the Company “placed at risk the privacy and security of the
11 users of its services,” that “Zoom intentionally designed their web conferencing service to bypass
12 browser security settings and remotely enable a user’s web camera without the consent of the
13 user,” and that, “[a]s a result, Zoom exposed users to the risk of remote surveillance, unwanted
14 videocalls, and denial-of-service attacks.” The complaint also alleged that “[w]hen informed of
15 the vulnerabilities Zoom did not act until the risks were made public, several months after the
16 matter was brought to the company’s attention,” that “Zoom exposed its users to a wide range of
17 harms, many of which are ongoing,” and that the Company’s “business practices amount to unfair
18 and deceptive practices under Section 5 of the FTC Act, subject to investigation and injunction by
19 the [FTC].”
20

21
22 38. On this news, Zoom’s stock fell \$1.32 per share, or 1.42%, to close at \$91.40 per
23 share on July 11, 2019.

24 39. Following these disclosures, however, Zoom’s stock price continued to trade at
25 artificially inflated prices throughout the Class Period as a result of Defendants’ continued
26 misrepresentations and omissions concerning Zoom’s data privacy and security mechanisms.
27
28

1 40. For example, on September 5, 2019, Zoom hosted an earnings call with investors
2 and analysts to discuss the Company’s second quarter financial results. In responding to a question
3 regarding the Company’s technology and architecture, Defendant Yuan stated, in relevant part:

4 ***I think the combination of technology, ease-of-use, security will win the customer***
5 ***trust, right.*** If you look at all other solutions out there today, all of them architecture
6 is very old, right? Not a design for modern video cloud -- video first architecture.
7 That’s why we’re ahead of any of our competitors for several years. Otherwise, I
will go back to work all the weekend.

8 (Emphasis added.)

9 41. Then, on September 13, 2019, Zoom filed a Quarterly Report on Form 10-Q with
10 the SEC, reporting the Company’s financial and operating results for the quarter ended July 31,
11 2019 (the “2Q20 10-Q”). The 2Q20 10-Q contained substantively the same statements referenced
12 in ¶¶ 27, 29-31, and 33, *supra*, touting the way Zoom interacts with various operating systems and
13 third-party applications, the trust its platform builds with customers and users, and the Company’s
14 efforts relating to privacy, data protection and information security; providing generic “catch-all”
15 provisions that were not tailored to Zoom’s actual known risks concerning weaknesses in its
16 cybersecurity and data protection systems; and containing SOX certifications signed by the
17 Individual Defendants attesting to the accuracy and reliability of the financial report those
18 certifications were appended to as an exhibit.

19 42. Additionally, in the 2Q20 10-Q’s section dedicated to disclosing legal proceedings,
20 Defendants asserted that “[w]e are not presently a party to any litigation the outcome of which, we
21 believe, if determined adversely to us, would individually or taken together have a material adverse
22 effect on our business, operating results, cash flows or financial condition,” even despite the fact
23 that legal proceedings had already been initiated by EPIC before the FTC on July 11, 2019,
24 regarding Zoom’s inadequate privacy and security measures, and at-risk software.
25
26
27
28

1 43. On December 9, 2019, Zoom filed another Quarterly Report on Form 10-Q with
2 the SEC, reporting the Company’s financial and operating results for the quarter ended October
3 31, 2019 (the “3Q20 10-Q”). The 3Q20 10-Q contained substantively the same statements
4 referenced in ¶¶ 27, 29-31, 33, and 42, *supra*, touting the way Zoom interacts with various
5 operating systems and third-party applications, the trust its platform builds with customers and
6 users, the Company’s efforts relating to privacy, data protection and information security, the lack
7 of any legal proceedings likely to have a material adverse effect on the Company’s business,
8 operating results, cash flows or financial condition; providing generic “catch-all” provisions that
9 were not tailored to Zoom’s actual known risks concerning weaknesses in its cybersecurity and
10 data protection systems; and containing SOX certifications signed by the Individual Defendants
11 attesting to the accuracy and reliability of the financial report those certifications were appended
12 to as an exhibit.

13
14
15 44. On March 4, 2020, Zoom hosted an earnings call with investors and analysts to
16 discuss the Company’s fourth quarter financial results. On that call, and while discussing an
17 example of the security and compliance that Zoom’s services ensured for its users, Defendant
18 Yuan stated, in relevant part:

19 I also want to thank VMware for trusting Zoom. VMware has been providing all
20 employees, globally, access to Zoom meetings and digital workspace, and will soon
21 utilize a large deployment of Zoom Phone. The easy, single sign-on access to Zoom
22 from any device is enabled to leverage the VMware Workspace ONE platform,
23 ***allowing employees to access all the applications they need from their device of
24 choice while ensuring security and compliance.***

25 (Emphasis added.)

26 45. On March 20, 2020, six days before the truth fully emerged regarding Zoom’s
27 deficient security and privacy systems, Zoom filed its first Annual Report on Form 10-K with the
28 SEC since its IPO, reporting the Company’s financial and operating results for the quarter and year
ended January 31, 2020 (the “2020 10-K”). As with the Offering Documents, the 2020 10-K

1 touted that Zoom’s “unique technology and infrastructure enable [*inter alia*] best-in-class
2 reliability.”

3 46. The 2020 10-K also touted that the Company’s Zoom Video Webinars feature
4 “easily integrates with [*inter alia*] Facebook Live . . . providing access to large bases of viewers,”
5 without disclosing how integration with Facebook could implicate users’ personal data, if at all.
6

7 47. Additionally, the 2020 10-K contained substantively the same statements
8 referenced in ¶¶ 27-31, 33, and 42, *supra*, touting the way Zoom interacts with various operating
9 systems and third-party applications, how the Company employed SDKs to partner with other
10 digital platforms and app providers, the trust its platform builds with customers and users, the
11 Company’s efforts relating to privacy, data protection and information security, the lack of any
12 legal proceedings likely to have a material adverse effect on the Company’s business, operating
13 results, cash flows or financial condition; providing generic “catch-all” provisions that were not
14 tailored to Zoom’s actual known risks concerning weaknesses in its cybersecurity and data
15 protection systems; and containing SOX certifications signed by the Individual Defendants
16 attesting to the accuracy and reliability of the financial report those certifications were appended
17 to as an exhibit.
18

19 48. The statements referenced in ¶¶ 40-47 were materially false and misleading because
20 Defendants made false and/or misleading statements, as well as failed to disclose material adverse
21 facts about the Company’s business, operational and compliance policies. Specifically,
22 Defendants made false and/or misleading statements and/or failed to disclose that: (i) Zoom had
23 inadequate data privacy and security measures; (ii) contrary to Zoom’s assertions, the Company’s
24 video communications service was not end-to-end encrypted; (iii) as a result of all the foregoing,
25 users of Zoom’s communications services were at an increased risk of having their personal
26 information accessed by unauthorized parties, including Facebook; (iv) usage of the Company’s
27
28

1 video communications services was foreseeably likely to decline when the foregoing facts came
2 to light; and (v) as a result, the Company’s public statements were materially false and misleading
3 at all relevant times.

4 **The Truth Fully Emerges**

5 49. On March 26, 2020—in the midst of the COVID-19 pandemic and shelter-in-place
6 orders from multiple national and local governments, as businesses increasingly turned to Zoom’s
7 video communication software to facilitate remote work activity —*Motherboard*, Vice Media’s
8 technology news subsegment, reported that Zoom’s “privacy policy do[es] [not] make clear . . .
9 that the iOS version of the Zoom app is sending some analytics data to Facebook, even if Zoom
10 users don’t have a Facebook account,” and that “Zoom is not forthcoming with the data collection
11 or the transfer of it to Facebook.” The article also alleged that “[t]he Zoom app notifies Facebook
12 when the user opens the app, [and provides] details on the user’s device such as the model, the
13 time zone and city they are connecting from, which phone carrier they are using, and a unique
14 advertiser identifier created by the user's device which companies can use to target a user with
15 advertisements.” The article also disclosed that “[s]everal days after *Motherboard* reached out for
16 comment and a day after the publication of this piece, Zoom confirmed the data collection in a
17 statement to *Motherboard*.”

18 50. Then, on March 27, 2020, Zoom issued a statement by Defendant Yuan, disclosing
19 “a change that [Defendants] have made regarding the use of Facebook’s SDK” after being “made
20 aware on Wednesday, March 25, 2020, that the Facebook SDK was collecting device information
21 unnecessary for us to provide our services.” Yuan admitted that “[t]he information collected by
22 the Facebook SDK did not include information and activities related to meetings such as attendees,
23 names, notes, etc., but rather included information about devices such as the mobile OS type and
24 version, the device time zone, device OS, device model and carrier, screen size, processor cores,
25
26
27
28

1 and disk space,” and that, “therefore [Defendants] decided to remove the Facebook SDK in [the]
2 iOS client and have reconfigured the feature so that users will still be able to log in with Facebook
3 via their browser.” Yuan also promised that Defendants “remain firmly committed to the
4 protection of our users’ privacy,” and that Defendants were “reviewing our process and protocols
5 for implementing these features in the future to ensure this does not happen again.”
6

7 51. The next trading day, on March 30, 2020, the *New York Times* reported that Zoom
8 is under scrutiny by the office of New York State Attorney General (“AG”), Letitia James
9 (“James”), “for its data privacy and security practices.” According to the article, James’s “office
10 sent Zoom a letter asking what, if any, new security measures the company has put in place to
11 handle increased traffic on its network and to detect hackers” in light of the recent COVID-19
12 pandemic. Specifically, the article, quoted James, who is “concerned that Zoom’s existing security
13 practices might not be sufficient to adapt to the recent and sudden surge in both the volume and
14 sensitivity of data being passed through its network,” and that, “[w]hile Zoom has remediated
15 specific reported security vulnerabilities, [the office] would like to understand whether Zoom has
16 undertaken a broader review of its security practices.”
17

18 52. According to the *New York Times* article, James’s investigation cited, *inter alia*,
19 Leitschuh’s earlier findings regarding webcam security issues with the Zoom app, the complaint
20 that followed from EPIC, the recent revelations from Vice Media’s *Motherboard* article, and the
21 Company’s reactive rather than proactive approach to addressing these issues. The article also
22 noted other concerns cited by James’s office, including how “the [Zoom] app may be
23 circumventing state requirements protecting student data.” According to the article, “some
24 children’s privacy experts and parents said they were particularly concerned about how children’s
25 personal details might be used,” and “[s]ome districts have prohibited educators from using Zoom
26 as a distance-learning platform.” The article also stated that, “[o]ver the last few weeks, internet
27
28

1 trolls have exploited a Zoom screen-sharing feature to hijack meetings and do things like interrupt
2 educational sessions or post white supremacist messages to a webinar on anti-Semitism—a
3 phenomenon called ‘Zoombombing.’”

4 53. That same day, *Bloomberg* reported that a user of Zoom’s services had filed a
5 lawsuit against the Company “who claims the popular video-conferencing service is illegally
6 disclosing personal information.” Specifically, the lawsuit alleged that Zoom “collects
7 information when users install or open the Zoom application and shares it, without proper notice,
8 to third parties including Facebook Inc.,” that “Zoom’s privacy policy doesn’t explain to users that
9 its app contains code that discloses information to Facebook and potentially other third parties,”
10 and that the Company’s “wholly inadequate program design and security measures have resulted,
11 and will continue to result, in unauthorized disclosure of its users’ personal information.”

12 54. Then, on March 31, 2020, the Federal Bureau of Investigation (“FBI”) reportedly
13 issued a warning about so-called “Zoom-bombing,” the phenomenon identified by the *New York*
14 *Times* where hackers can take over video-conferencing on the Company’s app.

15 55. Additionally, that same day, multiple news sources, including *The Intercept* and
16 *The Verge*, reported that Zoom’s video conferencing software is not, in fact, end-to-end encrypted
17 between meeting participants, contrary to the Company’s assertions, and that Zoom was actually
18 “using its own definition of the term, one that lets Zoom itself access unencrypted video and audio
19 from meetings.” Specifically, *The Intercept* article noted that, “despite this misleading marketing,
20 the service actually does not support end-to-end encryption for video and audio content, at least as
21 the term is commonly understood,” and it “[i]nstead it offers what is usually called transport
22 encryption,” which is less secure. The article disclosed that after *The Intercept* reached out to
23 Zoom for a comment about whether video meetings are actually end-to-end encrypted, a Zoom
24 spokesperson wrote that, “[c]urrently, it is not possible to enable E2E [end-to-end] encryption for
25
26
27
28

1 Zoom video meetings,” and that Zoom video meetings use the same encryption methods offered
2 by web servers to secure certain websites. As noted by *The Intercept* article, this is known as
3 transport encryption, “which is different from end-to-end encryption because the Zoom service
4 itself can access the unencrypted video and audio content of Zoom meetings.”

5
6 56. Then, on April 1, 2020, during after-market hours, *Reuters* reported that Space
7 Exploration Technologies Corp. (“SpaceX”) had banned its employees from using Zoom’s video
8 conferencing software because of “significant privacy and security concerns,” citing an internal
9 memo reviewed by *Reuters* following the FBI’s warning regarding “Zoombombing.” According
10 to *Reuters*, the National Aeronautics and Space Administration (NASA), one of SpaceX’s largest
11 customers, also decided to ban employee use of Zoom’s app.

12
13 57. That same day, Defendant Yuan published a blog post entitled, “A Message to Our
14 Users.” In the post, Defendant Yuan admitted that “[the Company] recognize[s] that we have
15 fallen short of the community’s – and our own – privacy and security expectations.”

16
17 58. Between March 27, 2020, and April 2, 2020, Zoom’s stock price fell \$29.77 per
18 share, or 19.62%, to close at \$121.93 per share on April 2, 2020.

19
20 59. On April 3, 2020, *The Street* reported that Defendant Yuan “recently dumped \$38
21 million of the company’s stock ahead of an investigation into security breaches at the video
22 conferencing company,” and that SEC “filings viewed by the Daily Mail showed that Yuan and
23 several other senior executives sold millions of dollars worth of their shares while the company
24 has been addressing privacy issues.” Specifically, the article disclosed that Defendant “Yuan . . .
25 made \$10.5 million in sales on Jan[uary] 14, another \$12.5 million on Feb[ruary] 12, and \$15.5
26 million on March 16,” while “Chief Marketing Officer Janine Pelosi has made close to \$14 million
27 in trades since February.”
28

1 60. That same day, Connecticut AG William Tong (“Tong”) announced his own
2 office’s investigation into Zoom’s privacy and security practices. In a statement to *Politico*, Tong
3 stated: “We are alarmed by the Zoom-bombing incidents and are seeking more information from
4 the company about its privacy and security measures in coordination with other state attorneys
5 general.”

6
7 61. Also on April 3, 2020, Citizen Lab, an interdisciplinary laboratory based at the
8 Munk School of Global Affairs & Public Policy at the University of Toronto, published a report
9 “examin[ing] the encryption that protects meetings in the popular Zoom teleconference app.”
10 Citizen Lab found that Zoom has “rolled their own” (*i.e.*, built its own) encryption scheme, “which
11 has significant weaknesses,” and “identif[ied] potential areas of concern in Zoom’s infrastructure,
12 including observing the transmission of meeting encryption keys through China.”

13
14 62. Later that day, during after-market hours, Zoom reportedly confirmed that, during
15 its efforts to ramp up its server capacity to accommodate the massive influx of users over the past
16 few weeks amid the COVID-19 pandemic, it “mistakenly” allowed two of its Chinese data centers
17 to accept calls as a backup in the event of network congestion. According to Defendant Yuan,
18 “[d]uring normal operations, Zoom clients attempt to connect to a series of primary datacenters in
19 or near a user’s region, and if those multiple connection attempts fail due to network congestion
20 or other issues, clients will reach out to two secondary datacenters off of a list of several secondary
21 datacenters as a potential backup bridge to the Zoom platform.”

22
23 63. Then, over the weekend, on April 4, 2020, the *Wall Street Journal* reported that, in
24 an interview with Defendant Yuan, Yuan had stated that “[i]f we mess up again, it’s done,” in
25 discussing the mounting privacy issues Zoom was facing, and that “I really messed up as CEO”
26 and “[t]his kind of thing shouldn’t have happened.”

1 64. On April 6, 2020, the following trading day, New York City’s Department of
2 Education announced that it had banned the use of Zoom in the city’s classrooms, and the city’s
3 mayor, Bill de Blasio disclosed that there had “been an effort by the Department of Education to
4 work with that company to ensure the privacy of our students to make sure their information could
5 not be accessed wrongly,” but that “[t]he chancellor and the team at the Department of Education
6 do not believe the company has cooperated.” Consequently, the city’s Department of Education
7 instead recommended Google or Microsoft Teams for classroom communications purposes amid
8 the state’s shelter-in-place order during the COVID-19 pandemic.

9
10 65. That same day, in a *Yahoo! Finance* article, it was reported that “[o]n April 1st, an
11 actor in a popular dark web forum posted a link to a collection of 352 compromised Zoom
12 accounts,” according to a spokesperson for cybersecurity firm Sixgill; that, “[i]n comments on this
13 post, several actors thanked him for the post, and one revealed intentions to troll the meetings”;
14 that “these links included email addresses, passwords, meeting IDs, host keys and names, and the
15 type of Zoom account”; that, according to Sixgill, “one belonged to a major U.S. healthcare
16 provider, seven more to various educational institutions, and one to a small business”; that “[t]he
17 accounts were listed for anyone to download, with the intent to troll and disrupt rather than profit”;
18 and that, “given that many are using Zoom for business purposes, confidential information could
19 be compromised.”

20
21 66. Following these additional disclosures and news, Zoom’s stock price fell \$5.26 per
22 share, or 4.10%, to close at \$122.94 per share on April 6, 2020.

23
24 67. As a result of Defendants’ wrongful acts and omissions, and the precipitous decline
25 in the market value of the Company’s securities, Plaintiff and other Class members have suffered
26 significant losses and damages.

1 72. Common questions of law and fact exist as to all members of the Class and
2 predominate over any questions solely affecting individual members of the Class. Among the
3 questions of law and fact common to the Class are:

- 4 • whether the federal securities laws were violated by Defendants' acts as alleged
5 herein;
- 6 • whether statements made by Defendants to the investing public during the Class
7 Period misrepresented material facts about the business, operations and
8 management of Zoom;
- 9 • whether the Individual Defendants caused Zoom to issue false and misleading
10 financial statements during the Class Period;
- 11 • whether Defendants acted knowingly or recklessly in issuing false and misleading
12 financial statements;
- 13 • whether the prices of Zoom securities during the Class Period were artificially
14 inflated because of the Defendants' conduct complained of herein; and
- 15 • whether the members of the Class have sustained damages and, if so, what is the
16 proper measure of damages.

17 73. A class action is superior to all other available methods for the fair and efficient
18 adjudication of this controversy since joinder of all members is impracticable. Furthermore, as the
19 damages suffered by individual Class members may be relatively small, the expense and burden
20 of individual litigation make it impossible for members of the Class to individually redress the
21 wrongs done to them. There will be no difficulty in the management of this action as a class action.

22 74. Plaintiff will rely, in part, upon the presumption of reliance established by the fraud-
23 on-the-market doctrine in that:

- 24 • Defendants made public misrepresentations or failed to disclose material facts
25 during the Class Period;
- 26 • the omissions and misrepresentations were material;
- 27 • Zoom securities are traded in an efficient market;

- 1 • the Company's shares were liquid and traded with moderate to heavy volume during the Class Period;
- 2
- 3 • the Company traded on the NASDAQ and was covered by multiple analysts;
- 4 • the misrepresentations and omissions alleged would tend to induce a reasonable investor to misjudge the value of the Company's securities; and
- 5
- 6 • Plaintiff and members of the Class purchased, acquired and/or sold Zoom securities between the time the Defendants failed to disclose or misrepresented material facts and the time the true facts were disclosed, without knowledge of the omitted or misrepresented facts.
- 7
- 8

9 75. Based upon the foregoing, Plaintiff and the members of the Class are entitled to a
10 presumption of reliance upon the integrity of the market.

11 76. Alternatively, Plaintiff and the members of the Class are entitled to the presumption
12 of reliance established by the Supreme Court in *Affiliated Ute Citizens of the State of Utah v.*
13 *United States*, 406 U.S. 128, 92 S. Ct. 2430 (1972), as Defendants omitted material information in
14 their Class Period statements in violation of a duty to disclose such information, as detailed above.

15 **COUNT I**

16 **(Violations of Section 10(b) of the Exchange Act and Rule 10b-5 Promulgated Thereunder**
17 **Against All Defendants)**

18 77. Plaintiff repeats and re-alleges each and every allegation contained above as if fully
19 set forth herein.

20 78. This Count is asserted against Defendants and is based upon Section 10(b) of the
21 Exchange Act, 15 U.S.C. § 78j(b), and Rule 10b-5 promulgated thereunder by the SEC.

22 79. During the Class Period, Defendants engaged in a plan, scheme, conspiracy and
23 course of conduct, pursuant to which they knowingly or recklessly engaged in acts, transactions,
24 practices and courses of business which operated as a fraud and deceit upon Plaintiff and the other
25 members of the Class; made various untrue statements of material facts and omitted to state
26 material facts necessary in order to make the statements made, in light of the circumstances under
27
28

1 which they were made, not misleading; and employed devices, schemes and artifices to defraud in
2 connection with the purchase and sale of securities. Such scheme was intended to, and, throughout
3 the Class Period, did: (i) deceive the investing public, including Plaintiff and other Class members,
4 as alleged herein; (ii) artificially inflate and maintain the market price of Zoom securities; and (iii)
5 cause Plaintiff and other members of the Class to purchase or otherwise acquire Zoom securities
6 and options at artificially inflated prices. In furtherance of this unlawful scheme, plan and course
7 of conduct, Defendants, and each of them, took the actions set forth herein.
8

9 80. Pursuant to the above plan, scheme, conspiracy and course of conduct, each of the
10 Defendants participated directly or indirectly in the preparation and/or issuance of the quarterly
11 and annual reports, SEC filings, press releases and other statements and documents described
12 above, including statements made to securities analysts and the media that were designed to
13 influence the market for Zoom securities. Such reports, filings, releases and statements were
14 materially false and misleading in that they failed to disclose material adverse information and
15 misrepresented the truth about Zoom's finances and business prospects.
16

17 81. By virtue of their positions at Zoom, Defendants had actual knowledge of the
18 materially false and misleading statements and material omissions alleged herein and intended
19 thereby to deceive Plaintiff and the other members of the Class, or, in the alternative, Defendants
20 acted with reckless disregard for the truth in that they failed or refused to ascertain and disclose
21 such facts as would reveal the materially false and misleading nature of the statements made,
22 although such facts were readily available to Defendants. Said acts and omissions of Defendants
23 were committed willfully or with reckless disregard for the truth. In addition, each Defendant
24 knew or recklessly disregarded that material facts were being misrepresented or omitted as
25 described above.
26
27
28

1 82. Information showing that Defendants acted knowingly or with reckless disregard
2 for the truth is peculiarly within Defendants' knowledge and control. As the senior managers
3 and/or directors of Zoom, the Individual Defendants had knowledge of the details of Zoom's
4 internal affairs.

5 83. The Individual Defendants are liable both directly and indirectly for the wrongs
6 complained of herein. Because of their positions of control and authority, the Individual
7 Defendants were able to and did, directly or indirectly, control the content of the statements of
8 Zoom. As officers and/or directors of a publicly-held company, the Individual Defendants had a
9 duty to disseminate timely, accurate, and truthful information with respect to Zoom's businesses,
10 operations, future financial condition and future prospects. As a result of the dissemination of the
11 aforementioned false and misleading reports, releases and public statements, the market price of
12 Zoom securities was artificially inflated throughout the Class Period. In ignorance of the adverse
13 facts concerning Zoom's business and financial condition which were concealed by Defendants,
14 Plaintiff and the other members of the Class purchased or otherwise acquired Zoom securities at
15 artificially inflated prices and relied upon the price of the securities, the integrity of the market for
16 the securities and/or upon statements disseminated by Defendants, and were damaged thereby.

17 84. During the Class Period, Zoom securities were traded on an active and efficient
18 market. Plaintiff and the other members of the Class, relying on the materially false and misleading
19 statements described herein, which the Defendants made, issued or caused to be disseminated, or
20 relying upon the integrity of the market, purchased or otherwise acquired shares of Zoom securities
21 at prices artificially inflated by Defendants' wrongful conduct. Had Plaintiff and the other
22 members of the Class known the truth, they would not have purchased or otherwise acquired said
23 securities, or would not have purchased or otherwise acquired them at the inflated prices that were
24 paid. At the time of the purchases and/or acquisitions by Plaintiff and the Class, the true value of
25
26
27
28

1 Zoom securities was substantially lower than the prices paid by Plaintiff and the other members of
2 the Class. The market price of Zoom securities declined sharply upon public disclosure of the
3 facts alleged herein to the injury of Plaintiff and Class members.

4 85. By reason of the conduct alleged herein, Defendants knowingly or recklessly,
5 directly or indirectly, have violated Section 10(b) of the Exchange Act and Rule 10b-5
6 promulgated thereunder.
7

8 86. As a direct and proximate result of Defendants' wrongful conduct, Plaintiff and the
9 other members of the Class suffered damages in connection with their respective purchases,
10 acquisitions and sales of the Company's securities during the Class Period, upon the disclosure
11 that the Company had been disseminating misrepresented financial statements to the investing
12 public.
13

14 COUNT II

15 **(Violations of Section 20(a) of the Exchange Act Against The Individual Defendants**

16 87. Plaintiff repeats and re-alleges each and every allegation contained in the foregoing
17 paragraphs as if fully set forth herein.

18 88. During the Class Period, the Individual Defendants participated in the operation
19 and management of Zoom, and conducted and participated, directly and indirectly, in the conduct
20 of Zoom's business affairs. Because of their senior positions, they knew the adverse non-public
21 information about Zoom's misstatement of income and expenses and false financial statements.
22

23 89. As officers and/or directors of a publicly owned company, the Individual
24 Defendants had a duty to disseminate accurate and truthful information with respect to Zoom's
25 financial condition and results of operations, and to correct promptly any public statements issued
26 by Zoom which had become materially false or misleading.
27
28

1 C. Awarding Plaintiff and the other members of the Class prejudgment and post-
2 judgment interest, as well as their reasonable attorneys' fees, expert fees and other costs; and

3 D. Awarding such other and further relief as this Court may deem just and proper.
4

5 **DEMAND FOR TRIAL BY JURY**

6 Plaintiff hereby demands a trial by jury.
